The second describes the book is divided into four. the first to introduce the basic concepts of the technology of detection; common sensors. resistive sensors. inductive sensors. eddy current sensors. capacitive sensors. piezoelectric sensors. photoelectric sensors. the output or principle of common sensor merge into a class. both for the students to understand the principle of the sensor. but also to facilitate the students to master this type of sensor that can be shared interface circuit; the third introduces temperature. pressure. flow. and material bit measurement of the four process parameters; Title IV introduces non-destructive testing techniques. Book content written taking into account the experimental equipment commonly used in various institutions to facilitate the students to grasp the commonalities of the various types of conventional instrumentation technology. This book can be used as textbooks and the higher engineering electrical class professional students (especially applied the undergraduate electrical class professional students) for professional engineering and technical personnel self-reference. Basic knowledge of the basic concept of the first detection of Contents Preface Chapter 1 detection technology 1.1 Detection Technology Overview 1.2 Methods of measurement 1.2.1 direct measurements. indirect measurements and the simultaneous measurement measure 1.2.2 deviations style. zero measurement and micro differential measurement of 1.3 detection systems 1.3.1 Detection System Basic Overview 1.3.2 the...
