Reviews

It is one of my personal favorite books. It is one of the most incredible ebooks I have ever read. You will not feel monotony at any moment of your own time (that's what catalogues are for relating to if you ask me).

Brand New Book ***** Print on Demand *****.Excerpt from Science, Art, and Methods of Teaching: Containing Lectures on the Science, Art, and Methods of Education With the Most Practical Modes of Imparting Instruction in Eleven Common School Branches After a careful study of the best works on education, and after an extensive experience in instructing students and teachers in the principles and methods of teaching, I was convinced that a work which would present the laws and modes of teaching more definitely than they are usually presented should be published. This work was mainly undertaken at the solicitation of a number of my students and friends with the intention of placing a useful handbook in the reach of the educators of our youth. The principles and methods herein discussed and illustrated are in perfect harmony with the teachings of the most successful educators of Europe and the United States. They have been applied by myself with satisfactory results during twelve years of public and private school service. The success of the work has been such as to warrant the expense of a revised edition. A few corrections and alterations have been made in the present edition which make an improvement on the first publication. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
